APS model classification

This note gives a small classification table for the current finite-model test suite.

Shape	Raw n
3-point chain	
4-point chain	
4-point diamond	
Representative cards	

Named representatives

Model	Purpose
Case1 / Case2	APS models where G2 holds but FG2 fails.
Case3	countermodel for A3-sensitive arguments.
Case4	countermodel for A4-sensitive arguments.
Trivial2	two-point baseline model.
Case1Godel / L4Id	comparison models for implication and fixed-point tests.
